OWNER'S MANUAL SUPPLEMENT

ELECTRIC CHAIN HOIST ED SERIES ED1050

1050 Lb. Capacity

Code, Lot and Serial Number

AWARNING

This equipment should not be installed, operated or maintained by any person who has not read and understood all the contents of this manual. Failure to read and comply with the contents of this manual can result in serious bodily injury or death, and/or property damage.

IMPORTANT INFORMATION ON HOW TO USE THIS MANUAL

This OWNER'S MANUAL SUPPLEMENT is intended for use *in combination* with the "Owner's Manual for Electric Chain Hoist ED Series 125 through 525 Lb. Capacity". Refer to the Table of Contents below to determine the location(s) of information pertaining to your hoist. References to the "Owner's Manual for Electric Chain Hoist ED Series 125 through 525 Lb. Capacity" will be designated using the acronym "EDOM".

2.0 Technical Information

2.1 Specifications

2.1.1 Product Code

2.1.2 Features and General Specifications

Push Button Pendant Control –	Standard
Weight/Size –	Light weight and compact size, easy to install, move, or store
Double Braking System –	A Weston style load brake and a regenerative brake
Low Headroom –	Die cast aluminum body provides low headroom, perfect for tight quarters
Upper Limit Switch –	Standard
Over-Travel Protection –	Friction clutch integrated with load brake and engineered to protect the hoist from overwinding
Smooth Operation –	Gears are immersed in an oil bath and have deep groove ball and needle bearings to support rotating components
Corrosion Resistant Load Chain -	Nickel-plated, heat treated alloy chain for long life
Chain Container –	Standard

2.1.3 Operating Conditions and Environment

Temperature range:	-4° to +104°F (-20° to +40°C	;)
Humidity:	85% or less	
Enclosure Rating:	Hoist Body	IP54
	Push Button Pendant	IP65
Supply Voltage:	Standard 120V-1-60	
ASME Duty Classification:	H2

**See Table 5-5 for discard dimensions.

2.3 Part Names

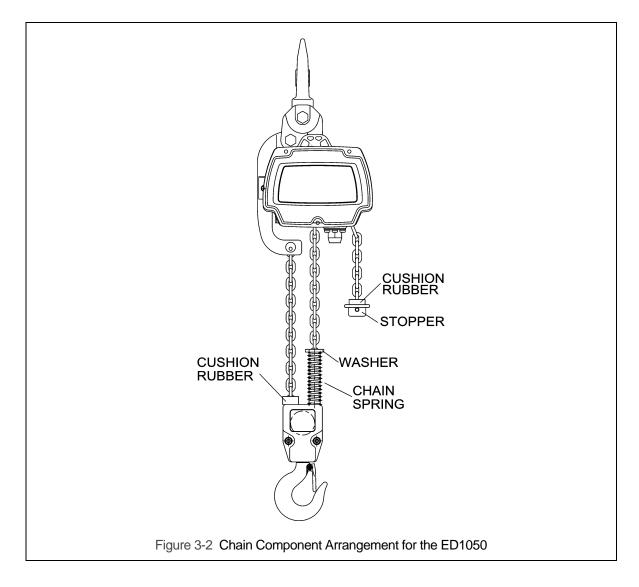

3.0 Pre-operational Procedures

3.2.1 Chain

3.2.1 The quantity and location of the chain components including Cushion Rubbers, Washers and Stopper Assemblies is shown in Table 3-2, and Figure 3-2. Ensure that all chain components are in the correct location and properly installed. Never operate the hoist with incorrect, missing or damaged chain components.

Table 3-2 Chain Stopper Placement									
Capacity Code	Capacity Code Load Side No Load Side								
S & DS	Adjacent to bottom yoke	Last link							

3.6 Mounting the Hoist

- 3.6.1 Manual Trolley Follow instructions in Owner's Manual provided with the trolley.
- 3.6.2 Hook Mounted to a Fixed Location Attach the hoist's top hook to the fixed suspension point.
- 3.6.3 **AWARNING** Ensure that the fixed suspension point rests on the center of the hook's saddle and the hook's latch is engaged.

5.0 Inspection

NOTICE

The information listed in this section is intended to supplement Section 5.7 of the EDOM.

Table 5-3 Hoist Inspection Methods and Criteria

Use this table in conjunction with Table 5-3 of the EDOM. The entries in this table replace in their entirety the corresponding entries in Table 5-3 of the EROM.

ltem	Method	Criteria	Action
Hooks - Idle Sheave and Axle (Bottom Hook on Double Fall Hoist)	Visual, Function	Pockets of Idle Sheave should be free of significant wear. Idle Sheave surfaces should be free of nicks, gouges, dirt and grime. Bearing parts and surfaces of Idle Sheave and Axle should not show significant wear. Idle Sheave should rotate freely with no roughness or significant free play.	Clean/lubricate, or replace as required.
Load Chain - Reeving	Visual	Chain should be reeved properly through Load Sheave (and Idle Sheave for double fall hoist) - refer to Section 6.4 . Chain, Chain Spring, Cushion Rubbers, and Stoppers should be installed properly - refer to Section 3.2 .	Reeve/Install chain properly.
Cushion Rubber	Visual	Should be free of significant deformation.	Replace.
Chain Springs	Visual	Chain springs should not be deformed or compressed.	Replace.

	Table 5-5 Top Hook & Bottom Hook Dimensions								
"k" Measured When New: Top:									
Capacity	Hook	*Nominal "k" Dimension inch (mm)	"u" Dimension inch (mm)		"t" Dimension inch (mm)				
(lbs)			Standard	Discard	Standard	Discard			
1050	Bottom	1.78 (45.1) (1.65(42))**	0.709 (18.0) (0.93(23.5))**	0.673 (17.1) (0.83(21))**	0.512 (13.0) (0.69(17.5))**	0.484 (12.3) (0.63(16))**			
1050	Тор	1.65(42)	0.93(23.5)	0.83(21)	0.69(17.5)	0.63(16)			

* These values are nominal since the dimension is not controlled to a tolerance. The **"k" dimension** should be measured when the hook is new - this becomes a reference measurement. Subsequent measurements are compared to this reference to make determinations about hook deformation/stretch. See EDOM Section 5.7, "Hooks - Stretch".

**Refers to the Old Style ED1050 Bottom Hook

9.0 Parts List

When ordering Parts, please provide the Hoist code number, lot number and serial number located on the Hoist nameplate (see fig. below).

Reminder: Per sections 1.1 and 3.9.4 to aid in ordering Parts and Product Support, record the Hoist code number, lot number and serial number in the space provided on the cover of this manual.

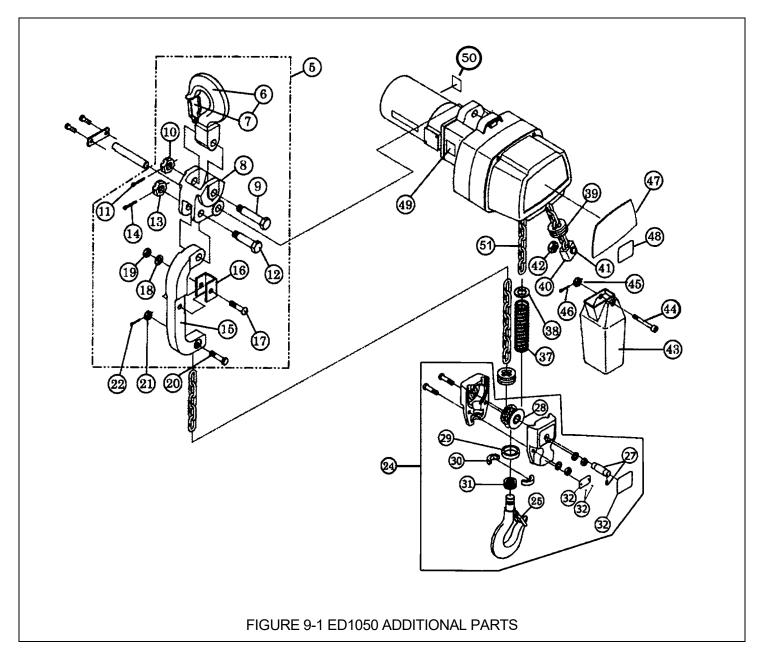

The parts list is arranged into the following sections:

Section	Page
9.1 ED1050 Additional Parts	14

A designator is used to distinguish parts that apply only to a particular model or option. Refer to Section 2 for hoist model numbers and additional descriptions. The designators are:

S = Single Speed

DS = Dual Speed
