

IN USE AT:

AUTOMOTIVE _Worldwide

Many customers in vehicle and engine production lines, as well as in battery production.

DOPPELMAYR _Austria

The eepos one system with cantilever crane rail supports the market leader in ropeway construction in the production of its ropeway systems and gondolas.

KUKA _Germany

Equipment for lifting and screwing cases in robot assembly.

TESLA _Germany

eepos equips the gigafactory for electric vehicles with several kilometers of crane profiles for the upper belt structure.

CLAAS _Germany

eepos one with 8,200 ft (2,500 m) of crane profiles in use at the new agricultural machinery production facility at the CLAAS main plant.

HORSCH _Germany

The leading manufacturer of innovative agricultural machinery relies on multiple crane applications by eepos in its new production hall (chain hoist, E-Balancer, screw application with lifting axes).

AGCO FENDT _Germany

Production lines equipment at the German plants in Marktoberdorf and Asbach-Bäumenheim.

LAYERTEC _Germany

At the manufacturer of optical components for laser technology, several eepos one systems were mounted upside down in the clean room.

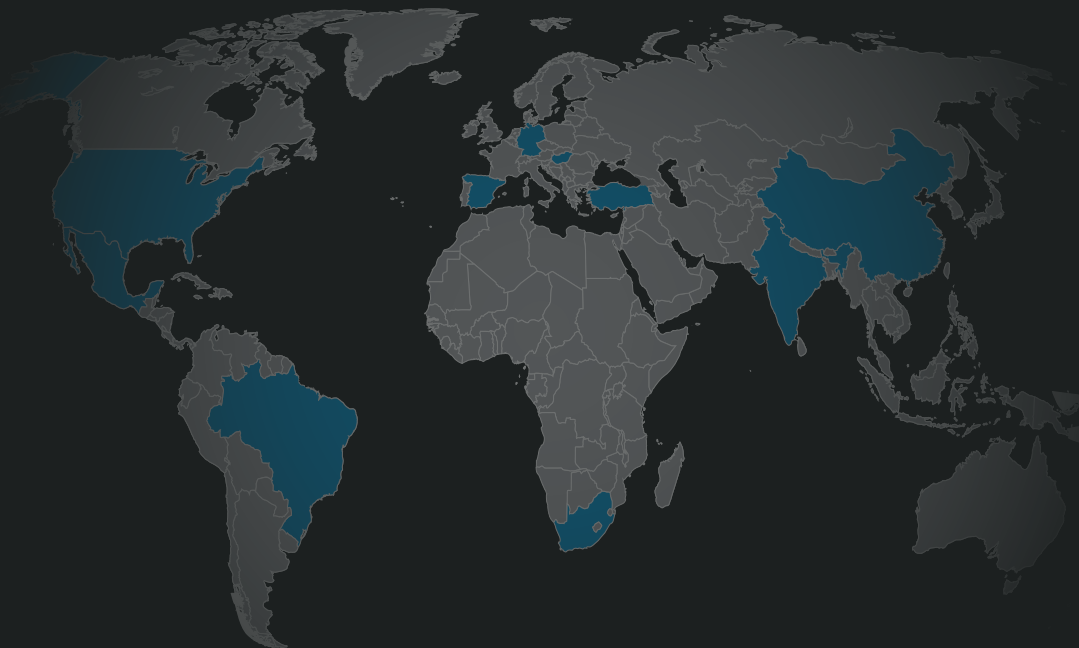

and many more

EXCELLENCE IN ERGONOMICS, QUALITY AND DURABILITY

eepos is a specialist in flexible load transport and energy supply, with headquarters in Germany (Wiehl). With 18 locations, we are active worldwide and employ a total of 120 people.

eepos excels for its strong customer orientation, its speed and transparency. We will be happy to help you find the perfect solution for your production.

OUR TEAM IS HAPPY TO BE THERE FOR YOU!

eepos one

THE MODULAR ALUMINUM CRANE SYSTEM FOR LOAD MOVEMENT UP TO 4,400 lbs (2,000 kg)

Easy to assemble, easy to operate,
easy to expand or customize

5 REASONS TO CHOOSE EEPOS ONE:

INNOVATIVE AND MODULAR

With the eepos one crane system you cover all areas of load movement up to 4,400 lbs (2,000 kg). You can use eepos ONE as an area crane system with up to 36 ft (11 m) span (as a single profile) and combine it with crane bridges that can be moved manually, electrically or pneumatically. Optionally, you can supplement the crane system with jib cranes and energy supply columns. All eepos components are compatible with each other.

ERGONOMIC AND SMOOTH RUNNING

Besides quality and flexibility, ergonomics is an essential feature of our crane systems. Our products are characterized by extreme ease of operation and jam-free travel and have been awarded the Ergonomics Seal of the German Institute for Health and Ergonomics.

SIMPLE AND FAST DESIGN

By using our online tool "Crane Designer", you can configure online a crane system adapted to your requirements in just a few minutes and immediately receive all technical drawings at your disposal. Alternatively, we will be happy to do the complete design of your system for you.

UNCOMPLICATED ASSEMBLY

Our system stands out with its lightness and offers numerous integration options. This makes it easy and fast to install without extensive reinforcement on the building. Upon request, our authorized installation partners will be happy to take over the installation of your system and the annual UVV inspection.

RELIABLE AND COMPETENT

We put our hearts and souls into every project. Our primary goal is to satisfy our customer. Over the last few years, we have been able to establish numerous long-standing and trusting partnerships.

LET US INSPIRE YOU!

THE EEPOS RAIL SYSTEM AT A GLANCE

1 PROFILE XS-XXL

The eepos profiles are available in the sizes XS to XXL and serve the payload range up to 4,400 lbs (2,000 kg). A range of profiles allows us to select the most suitable profile for the application avoiding unnecessary weight/cost increases.

2 TROLLEYS

The eepos trolleys are compatible with all profile sizes (XS to XXL) and are extremely ergonomic with low breakaway forces, smooth-running performance, and jam-free operation.

3 MOUNTINGS

eepos offers numerous suspension variants for their crane systems, so you can avoid additional steel constructions and save space and costs.

4 ITEM® -SLOTS

Via the standard profile slots in our aluminum profiles, extensions and additions can be made without any problems.

5 SERVICE STATION

This easy-to-remove panel allows quick access for maintenance, to exchange trolleys, or to add/remove a bridge, a media column, or any movable device.

6 HOISTS

Harrington hoists offer superior quality and reliability and can be provided as a single source with eepos crane systems. eepos one trolleys are also compatible with other manufacturers.

7 ENERGY SUPPLY

Whether cable trolleys, external conductor, energy chain or stationary energy supply, eepos can offer several innovative solutions with its modular system.

8 LIFTING AXIS

The eepos move lifting axis guarantees precise tool handling and backlash-free load transport, even with off-center loads.

” LIGHTWEIGHT YET ROBUST, DURABLE, RELIABLE – OUR WORKERS HAVE BECOME REAL FANS OF EEPOS ALUMINUM CRANES! “

Mechanical maintenance foreman at Iveco
